

Cement Technician

Pay Scale: \$21.00/hour

Location: Bloomsdale, MO

Holcim (US) Inc., one of the nation's largest manufacturers and distributors of cement and mineral components, has an immediate opening in their Ste. Genevieve, Missouri Greenfield plant for a Cement Technician. This is a unique opportunity to participate in all phases of a new state-of-the-art greenfield quarry, cement plant and distribution terminal.

The Cement Technician position is a multi-skilled position responsible for the operation and maintenance of the cement plant.

Position Responsibilities (key duties, scope of position, goals, expectations, skill requirements, travel requirements):

- Perform walk-by inspections & checklists on operating process plant
- Perform mechanical maintenance activities, make repairs, installations and replacements on a wide variety of equipment (Example: rigging, cutting, welding, fitting, lubrication, alignments, basic low voltage electrical repairs, housekeeping, hydraulics, pneumatics, operate light and medium sized plant mobile equipment)
- Troubleshoot and optimize equipment during operation and mechanical breakdowns
- Maintain documentation, plan and organize work, participate in various team activities
- Other duties as assigned

Work Environment:

Job has a lot of variety and is not routine. Cement techs will be required to work outside, at heights, warm temperatures, and at times around and over water, in dusty environments and confined spaces. Position will be predominantly day shift but incumbent will be required to work shifts as necessary.

Ideal candidates would have a high mechanical aptitude, ability to work in a team based environment and excellent mechanical knowledge, and experience working in a heavy manufacturing environment.
